Crossing borders

Crossing borders may not be easy, but it's a must if you want to make a real impact. In this interactive panel discussion, experts share their knowledge on what it takes to go international. We discuss what you can expect from regional ecosystems and the role corporates can play, and also what conditions have to be met before they are willing to invest time and effort in you as a startup. As a startup, you will not leave the room without having answer to this key question: what is the first step to take?

Investors Panel

During this panel we invite VC's and business angels to join us on stage and discuss the challenges and opportunities that startups are facing. They reflect on their own role and the role of other stakeholders. What are VCs looking for and what not. Medtech, Digital Health or Silver Economy? What do VCs learn? This interactive session is the place to be if you want to ask investors everything you always wanted to.

Day3 ⁽³⁾

Female entrepreneurship in Health

Traditionally, the health care sector is seen as a sector where females form a large part of the working population. Does this also hold true for female entrepreneurship in health? If not, what can we do to stimulate female entrepreneurship in health? Who are the inspiring examples and what can we learn from them? Be sure to attend this panel discussion if you are interested in female foundership and the strength of diversity.

Pitch award

Join the finals of the StartupFest Health pitch award.

Over the last couple of months we invited startups to join the 5 regional pitch competitions. The five finalists will join this session to give their best pitch in front of our international jury, made by experienced founders and entrepreneurs.

Moderated by Douwe Jippes

This session is powered by Healthy Capital

Where's the exit?

As a founder of a health care startup, you may be entirely focussed on solving an issue and making a business out of it. As an investor, you may be focussing on maximising yield. In this panel discussion we explore if and how we can bring these worlds together: is striving for an exit a goal in health care markets or not and if so, how do you work towards such a goal without losing sight of bringing solutions to health care?

Orange track

16:00 – 17:00
Productieruimte

Closing plenary

We are closing the event with the final plenary session. On stage new perspectives, reflections and take-aways will be shared. We will have some interesting pitches from startups and scale-ups, celebrate successes and look forward to following-up on what has been achieved during this edition of StartupFestHealth. Also, we will award one 2-week all-in Taiwan Business Explorer trip! Don't miss this! Including flights, soft landing services and local business support by multiple Taiwanese organisations.
